

Font Installation Instructions

Windows 7:

1. Save your font file to your computer's desktop using the download link provided with your order
2. Go to the desktop and right-click on the font.
3. Select 'Properties' from the menu.
4. Under the 'General' tab, you'll see an 'Unblock' button. Click on it, then click 'OK'. If there is no 'Unblock' button, skip this step.
5. Back on the Desktop, double-click on the font to install it.
6. You're done!

Windows Vista:

1. Save your font file to your computer's desktop using the download link provided with your order
2. Go to the Desktop and right-click on the font.
3. Select 'Install' from the menu.
4. A pop-up box asking for your permission to continue may appear. Click 'Continue'.
5. You will see a task bar showing the progress of installing your font. This should only appear for a few seconds, or up to one minute.
6. You're done!

Windows XP & Previous:

1. Save your font file to your computer's desktop using the download link provided with your order
2. Go to the Desktop and right click on the font file icon
3. Select 'Copy'
4. Click 'Start' at the very bottom left of your computer screen
5. Click 'Run' from the menu
6. Type in: fonts
7. Click 'OK' and the fonts folder should open up
8. Select 'Edit > paste' and the the font will be installed
9. Close the fonts folder
10. You're done!
